

For Immediate Release

WORLD SOFTWARE CORP. PREVIEWS WORLDOX WEB MOBILE 2.0 WITH NEW MICROSOFT OFFICE INTEGRATION AT ILTA 2011 CONFERENCE

GLEN ROCK, NJ– AUGUST 19, 2011 - [World Software Corporation® \(www.worldox.com\)](http://www.worldox.com) will be previewing Worldox Web Mobile 2.0 at the [ILTA 2011 Conference](#) in Nashville from August 22-25 (booth#224). In addition to having a newly-designed user interface, Worldox Web 2.0 will enable integration with Microsoft Office on both Open and Save commands, so users can access Worldox's profiling system and search tools while working remotely.

With Worldox Web Mobile, attorneys and staff can access their documents 24/7 over the Internet or from laptops, smartphones, iPhones and iPads. The system intuitively integrates with the Office applications on the computer where you are logging in, and Worldox pops up over the usual Windows Explorer dialog boxes to provide additional organization.

Fred Grossman, World Software's Vice President of Software Development remarks, "For many years, Worldox Web Mobile has assisted Worldox customers in accessing and uploading documents online when working from home or traveling. Worldox Web Mobile 2.0 represents a major leap forward because it tightly integrates the Web Mobile system with native Microsoft Office applications resident on the accessing workstation. These applications will no longer exist in a vacuum, unaware of each other's existence; instead, they will be connected in a tangible way that truly benefits Web Mobile users."

Worldox Web Mobile is sold as an add-on to Worldox that can be installed on a network or accessed as a hosted online solution with a monthly subscription fee. Worldox Web Mobile is not a standalone system and must have Worldox operational as a prerequisite.

Worldox Web Mobile 2.0 is due for release in the first quarter of 2012.
