

## For Immediate Release

### World Software Corporation Announces Worldox GX3 Enterprise at ILTA 2012

ILTA CONFERENCE, WASHINGTON, D.C. – August 27, 2012 – At ILTA, [World Software Corporation](http://www.worldox.com)® ([www.worldox.com](http://www.worldox.com)) announces Worldox GX3 Enterprise, its document management system (DMS) with a new architecture designed to support multi-office and remote connectivity environments (booths#706-708). The Enterprise version includes a patent pending add-on server component that enables fast connectivity for remote offices and externally located users.

Worldox GX3 Enterprise allows centralized document storage and indexing in a firm's data center, to provide efficient deployment to remote offices and locations. The patent pending architecture works synchronously with Microsoft published application technology. It allows lawyers and staff to utilize the full Worldox GX3 application feature set delivered to their desktops, providing seamless interaction with locally installed applications and third-party add-ons. Enterprise delivers the same functionality as GX3 Professional, and GX3 is the minimum version required before Enterprise can be added.

Other enhancements include improved Active Directory integration, enterprise index server monitoring tools, a new search engine, improved archiving tools, and many other features which make GX3 the most powerful version of Worldox to date.

Law firm Weinberg Wheeler Hudgins Gunn & Dial has been one of the beta-testers of Worldox GX3 Enterprise. Edward J. Buonopane, the firm's Director of Information Technology, says, "Our staff is very excited about the new GX3 Enterprise. The ability to use local desktop applications while accessing the remote Worldox database has been great. The new GX3 Enterprise provides a better overall experience than the Citrix desktop they had been using."

President Ray Zwiefelhofer comments, "Worldox GX3 Enterprise now provides the perfect choice for law firms to run Worldox needing a centralized document set and complex multi-office and remote connectivity requirements. During our beta-testing, firms indicate the technology and the software have performed extremely well, and they are pleased to have eliminated document storage and servers in their remote offices. We are now looking to our

next milestone, the launch of Worldox GX3 Cloud, a pure-cloud delivery of the DMS which is planned for release in early 2013.”
