

# 8 REASONS to FINANCE EQUIPMENT & SOFTWARE

Since 1978 Dimension Funding has been working with law firms like yours across the U.S. to provide financing solutions to help small- to medium-sized companies grow their business.

## Overcomes Budget Limitations

Financing lets you get equipment & software free of budget ceilings. Having low monthly payments allows you to hold expenditures within budget limits.

## Improves Cash Flow

Keep your liquidity. Financing allows you to make low, fixed monthly payments rather than a large expenditure of cash.

## Conserves Working Capital

Financing frees up working capital and preserve your lines of credit. Maintain your liquidity while investing in your business.

## Fixed Monthly Payments

Turn the entire purchase cost into monthly payments. Make a fixed monthly payment for equipment & software including all project costs such as delivery and maintenance.

## Tax Advantages

Take advantage of IRS Section 179 to deduct the entire cost of the equipment or software on your taxes (limitations apply).

## Simplifies Expansion

Invest in or expand your business by purchasing the necessary equipment & software without impacting your cash flow. It also protects against inflation.

## Minimizes Obsolescence

Ownership and depreciation of equipment encourages its use beyond its productive life. Financing allows you to upgrade or include add-ons.

## Professional Services

100% of project costs included in the financing such as installation, implementation and third-party vendors.
