

Produce well-formatted documents more quickly, efficiently and consistently

iCreate is a document production software designed specifically for the legal industry. Law firms must produce documents ranging in difficulty from simple memos to complex agreements, as well as disclosure documents and briefs. Firms must work under the highest demands for both accuracy and turnaround.

Legal practice requires a fully integrated system of templates and macros that construct documents with the click of a button and on-screen prompts that ask the "right" questions. iCreate does just that...and more!

PROMOTES BEST PRACTICES FOR MS WORD:

iCreate's Enhanced Native Architecture™ (ENA) for Microsoft Word promotes the best use of Word, drawing on the most effective features for legal documents instead of depending on programmed customizations or sub functions.

ACCELERATES AND STREAMLINES DOCUMENT PRODUCTION:

iCreate offers an exceptional return on investment by streamlining the document production process and increasing staff productivity. When electronic document collaboration occurs between multiple parties, documents created or edited with iCreate can be viewed and edited correctly by Word users, whether or not they use iCreate.

STANDARDIZES DOCUMENT PRODUCTION:

iCreate is designed to meet the high demands of the legal industry. Its centralized template launcher, advanced pleading administration, enhanced outline numbering ribbons and contact management integration provide unsurpassed capabilities for creation, editing and standardization of legal documents.

SIMPLIFIES ADMINISTRATION:

iCreate is highly customizable by in-house staff without VBA experience. With a small application

New features of iCreate 7 include:

- Numerous templates for quick document creation
- Numbering and formatting ribbons for repurposing documents
- Open XML document format compliancy
- A sleek new look, with intelligent, simplified dialog boxes
- XML driven features. Features that were template specific can now be used in any template
- Enhanced contact management integration, including dynamic address updating
- Enhanced administration and configuration options

footprint, the package is simple to administer and the source code for customizable components is open.

INTEGRATION WITH MISSION-CRITICAL SOFTWARE APPLICATIONS:

iCreate is integrated with many software applications including widely-used document and contact management systems.

WHAT OUR CLIENTS ARE SAYING:

"Nossaman has used iCreate since 2000 and has found it to be an integral part of our desktop workflow. Upgrades to the suite of Microsoft Office products have been less intrusive to our users over the years because iCreate integrates natively with Office. This makes moving to newer versions of Office and iCreate much easier, along with integrating seamlessly with our other desktop applications. We expect to rely on iCreate and Esquire Innovations to be there to assist whenever we need them in the future."
