WORLD SOFTWARE CORPORATION ANNOUNCES INTEGRATION WITH FUJITSU SCANSNAP SCANNERS

Ridgewood, NJ, July 1, 2009 – World Software Corporation, creator of the industry-leading Worldox document management software and Fujitsu Computer Products of America, Inc., the market leader in document imaging scanners and services, today announced that the Worldox software is fully compatible with the Fujitsu ScanSnap S300 and ScanSnap S1500 desktop scanners.

The Worldox - ScanSnap integration provides a powerful, affordable, and compact solution to increase productivity, correspondence, and document collaboration for legal professionals. Scanning and storing documents is significantly easier when Worldox clients use Fujitsu ScanSnap scanners, increasing the effectiveness of the organizational infrastructure. The Integration links the scanning of documents to a “profiling” process used to locate file in a tightly controlled document management environment. It’s a simple, quick process:

- Users scan in documents, then profile (identify) those files in pop-up Worldox windows.
- Once profiled, scanned document files can be located, previewed and opened within Worldox, just like any other document type.
- Best of all, ScanSnap’s native OCR feature produces fully text-searchable documents ...no extra steps needed.

“Worldox is essential for day-to-day workflow and information management at law firms. Our customers often ask us to recommend the easiest way to scan documents,” said Ray Zwiefelhofer, executive vice president, World Software Corporation. “ScanSnap is at the top of our list, and the integration was a clear match.. The relationship with Fujitsu will certainly benefit our existing and future customers.”

“Fujitsu is focused on providing the most innovative document imaging solutions on the market. With our combined solution, Worldox customers can not only scan to their document management software but also directly into email or fax. This provides Worldox customers with additional, advanced functionality to help streamline operations and to help workers become more productive and efficient when utilizing ScanSnap scanners to digitize documents,” Douglas Rudolph, vice president, product management and business development, Fujitsu Computer Products of America, Inc.

For more information on the Fujitsu ScanSnap product line, please visit <http://us.fujitsu.com/scansnap/>, or visit the ScanSnap Community site at <http://scansnapcommunity.com/>.
