

For Immediate Release

World Software Corporation® Launches Worldox CompleteCloud Virtual Data Center for Law Firms

RIDGEWOOD, NJ – August 19, 2010 - [World Software Corporation® \(www.worldox.com\)](http://www.worldox.com), the company behind the award-winning [Worldox® Document Management System \(DMS\)](#) software, today announced launch of [Worldox CompleteCloud](#), a secure virtual data center for law firms.

Powered through a partnership with reputable cloud provider [CoreBanc Inc.](#), CompleteCloud is a hosted environment complete with server and desktop software including Worldox, Microsoft® Office Professional and Microsoft Exchange – a full Windows desktop for one low monthly price.

World Software Corporation is the first legal DMS provider to launch its own branded hosted desktop and server offering, proof of the innovative spirit of the company and its ability to stay abreast of the latest technology.

Worldox CompleteCloud includes a core set of essential components including:

- Worldox GX2 DMS
- Windows 7 Virtual Desktop
- Microsoft Office Professional 2010 (Word, Excel, Outlook, PowerPoint, Access)
- Microsoft Exchange with SPAM filtering
- Managed virtual servers
- All client/server licenses, patch management, backups, redundancy, upstages, etc.

In addition to the CompleteCloud offering, Worldox resellers will be able to integrate other applications such as time and billing and practice management to create a complete legal office bundle.

World Software President Ray Zwiefelhofer expressed great enthusiasm about this new offering. He remarks, "Worldox has always been associated with inventiveness and quality, but it has historically been a client/server product. What most do not know is we have hundreds of customers that have been using Worldox in a virtual environment, either through our partner companies, or from their own IT departments' efforts. This is a viable alternative delivery method for Worldox and we have priced this service reasonably, perhaps comparable to what you would pay for a SaaS-based DMS by itself, except that with Worldox CompleteCloud, you get all of your essential apps and managed virtual servers. We believe we are breaking ground on a data delivery method which has proven itself and whose time has come."

For one low monthly price, Worldox customers can now access the DMS and other essential applications, anytime, anywhere, without maintaining their own infrastructure. They get their whole environment as a service instead of just a single SaaS application. Zwiefelhofer says, "We are proud to partner with CoreBanc to make this possible – they have proven their ability to maintain a secure cloud-based solution for a great many professional firms and corporations and we have complete confidence in their resources."

According to Tim Tyler, President of CoreBanc Inc., "With Worldox as an established leader in document management for the legal community, I could not be more excited about this strategic partnership and the impact we are going to have in the Computing as a Service platform."
