**For Immediate Release**

### World Software Corporation Unveils Worldox for Mac
### at ABA TECHSHOW Today
*Mac Version Contains Many Major Features of Worldox Document Management System*

**ABA TECHSHOW, CHICAGO – April 4, 2013 –** Today at the ABA TECHSHOW in Chicago, World Software Corporation® (www.worldox.com) unveils Worldox for Mac, a Mac-enabled version of the popular Worldox Document Management System (TECHSHOW booth#316-8.)

Worldox for Mac includes much of the same functionality as Worldox for Windows, and has been built to provide Mac users with the same business-strength DMS Windows users have enjoyed for 20 years.

Worldox for Mac integrates with Microsoft Office Suite and Adobe Acrobat upon File/Open and File/Save As to save a new file.  It also includes full text searching, version control, copy/move/delete functions, check-in and upload, and select email management features.

Many other standard Worldox features such as Direct Access, Workzone Drag and Drop and Bookmarks are also incorporated into the Mac version.

The Mac version is not a standalone product; it requires a Worldox back-end including file server and indexer.  It was designed for use with existing Worldox GX3 installs or Mac shops that utilize Worldox GX3 Cloud.  Firms using Worldox GX3 Cloud can use both Windows and Mac clients interchangeably.

According to World Software Corporation president Ray Zwiefelhofer, "Worldox for Mac is a huge breakthrough since it brings the core features of our award-winning DMS to Mac users. Our initial inspiration was the remarkable popularity of the Worldox iPad app we introduced two years ago, which allows Worldox users with iPads to access many features of the document management system on their tablets.  With the rising tide of bring-your-own-device, iOS products are everywhere.  We realized our customers needed to have both Windows and Mac options available to them."

Early release trials of Worldox for Mac and web demonstrations of the software are available free of charge.  Worldox for Mac is expected to be available for release in summer 2013.
