

Advanced compareDocs integration into Worldox now available

Sydney, Australia and Ridgewood, NJ—20 April, 2009—DocsCorp, a global leader in content and information management and workflow, announced today the release of an enhanced version of its document comparison application—**pdfDocs compareDocs**—for Worldox™.

“This latest compareDocs enhancement provides Worldox clients with a seamless, integrated comparison workflow that delivers unprecedented levels of accuracy and efficiency to meet the complex comparison needs of today's law firms,” states World Software Corporation® Executive Vice President, Ray Zwiefelhofer.

“We are very excited about the compareDocs Worldox release,” says DocsCorp President Dean Sappey, “as the enhanced integration will drive significant process improvements when comparing documents. It also represents the most advanced integration into the Worldox document management system by any partner to date.”

compareDocs streamlines the process of comparing documents in Worldox, reducing the complexity of the task to a few simple steps. Now users can select the documents they want to compare in Worldox, click the *Compare with compareDocs* button on the main menu, or right-click and select compare. With a single click, users have the option to compare and email a comparison report; compare and save as a new document; compare and save as a new version, compare and save as a related document; compare and save to *My Computer*, or compare and view the comparison report.

Document comparison with a difference

The easy-to-use compareDocs interface lets you compare anything to anything (Word-to-Word, PDF-to-PDF, Word-to-PDF). Once the changes have been identified, compareDocs outputs the detected changes directly into a new document. With Word-to-Word comparisons, for example, the new document becomes your next version of the compared documents – a live working Word document. This approach results in a more efficient document review process. No more proprietary viewing technology; no more reformatting comparison documents; no more retraining staff; no more time wasted!
