

Harden Your Defenses

The topics listed below are not all absolute requirements for security. This is merely a list of security products and precautions that can be researched and discussed with firm management. Each firm must perform their own risk assessment to determine what products meet their unique needs.

- Spam filters
- Encryption
- Off-site backups
- Remote Access Policy
- Patching servers and workstations
- Firewalls
- Virtual Private Network (VPN)
- Group Policies
- SCCM, WSUS or some other patching product
- Network Access Control (NAC)
- Vulnerability scanning
- Mobile device management
- Security Information & Event Management (SIEM)
